Rscripts.net

Media kit, October 2026

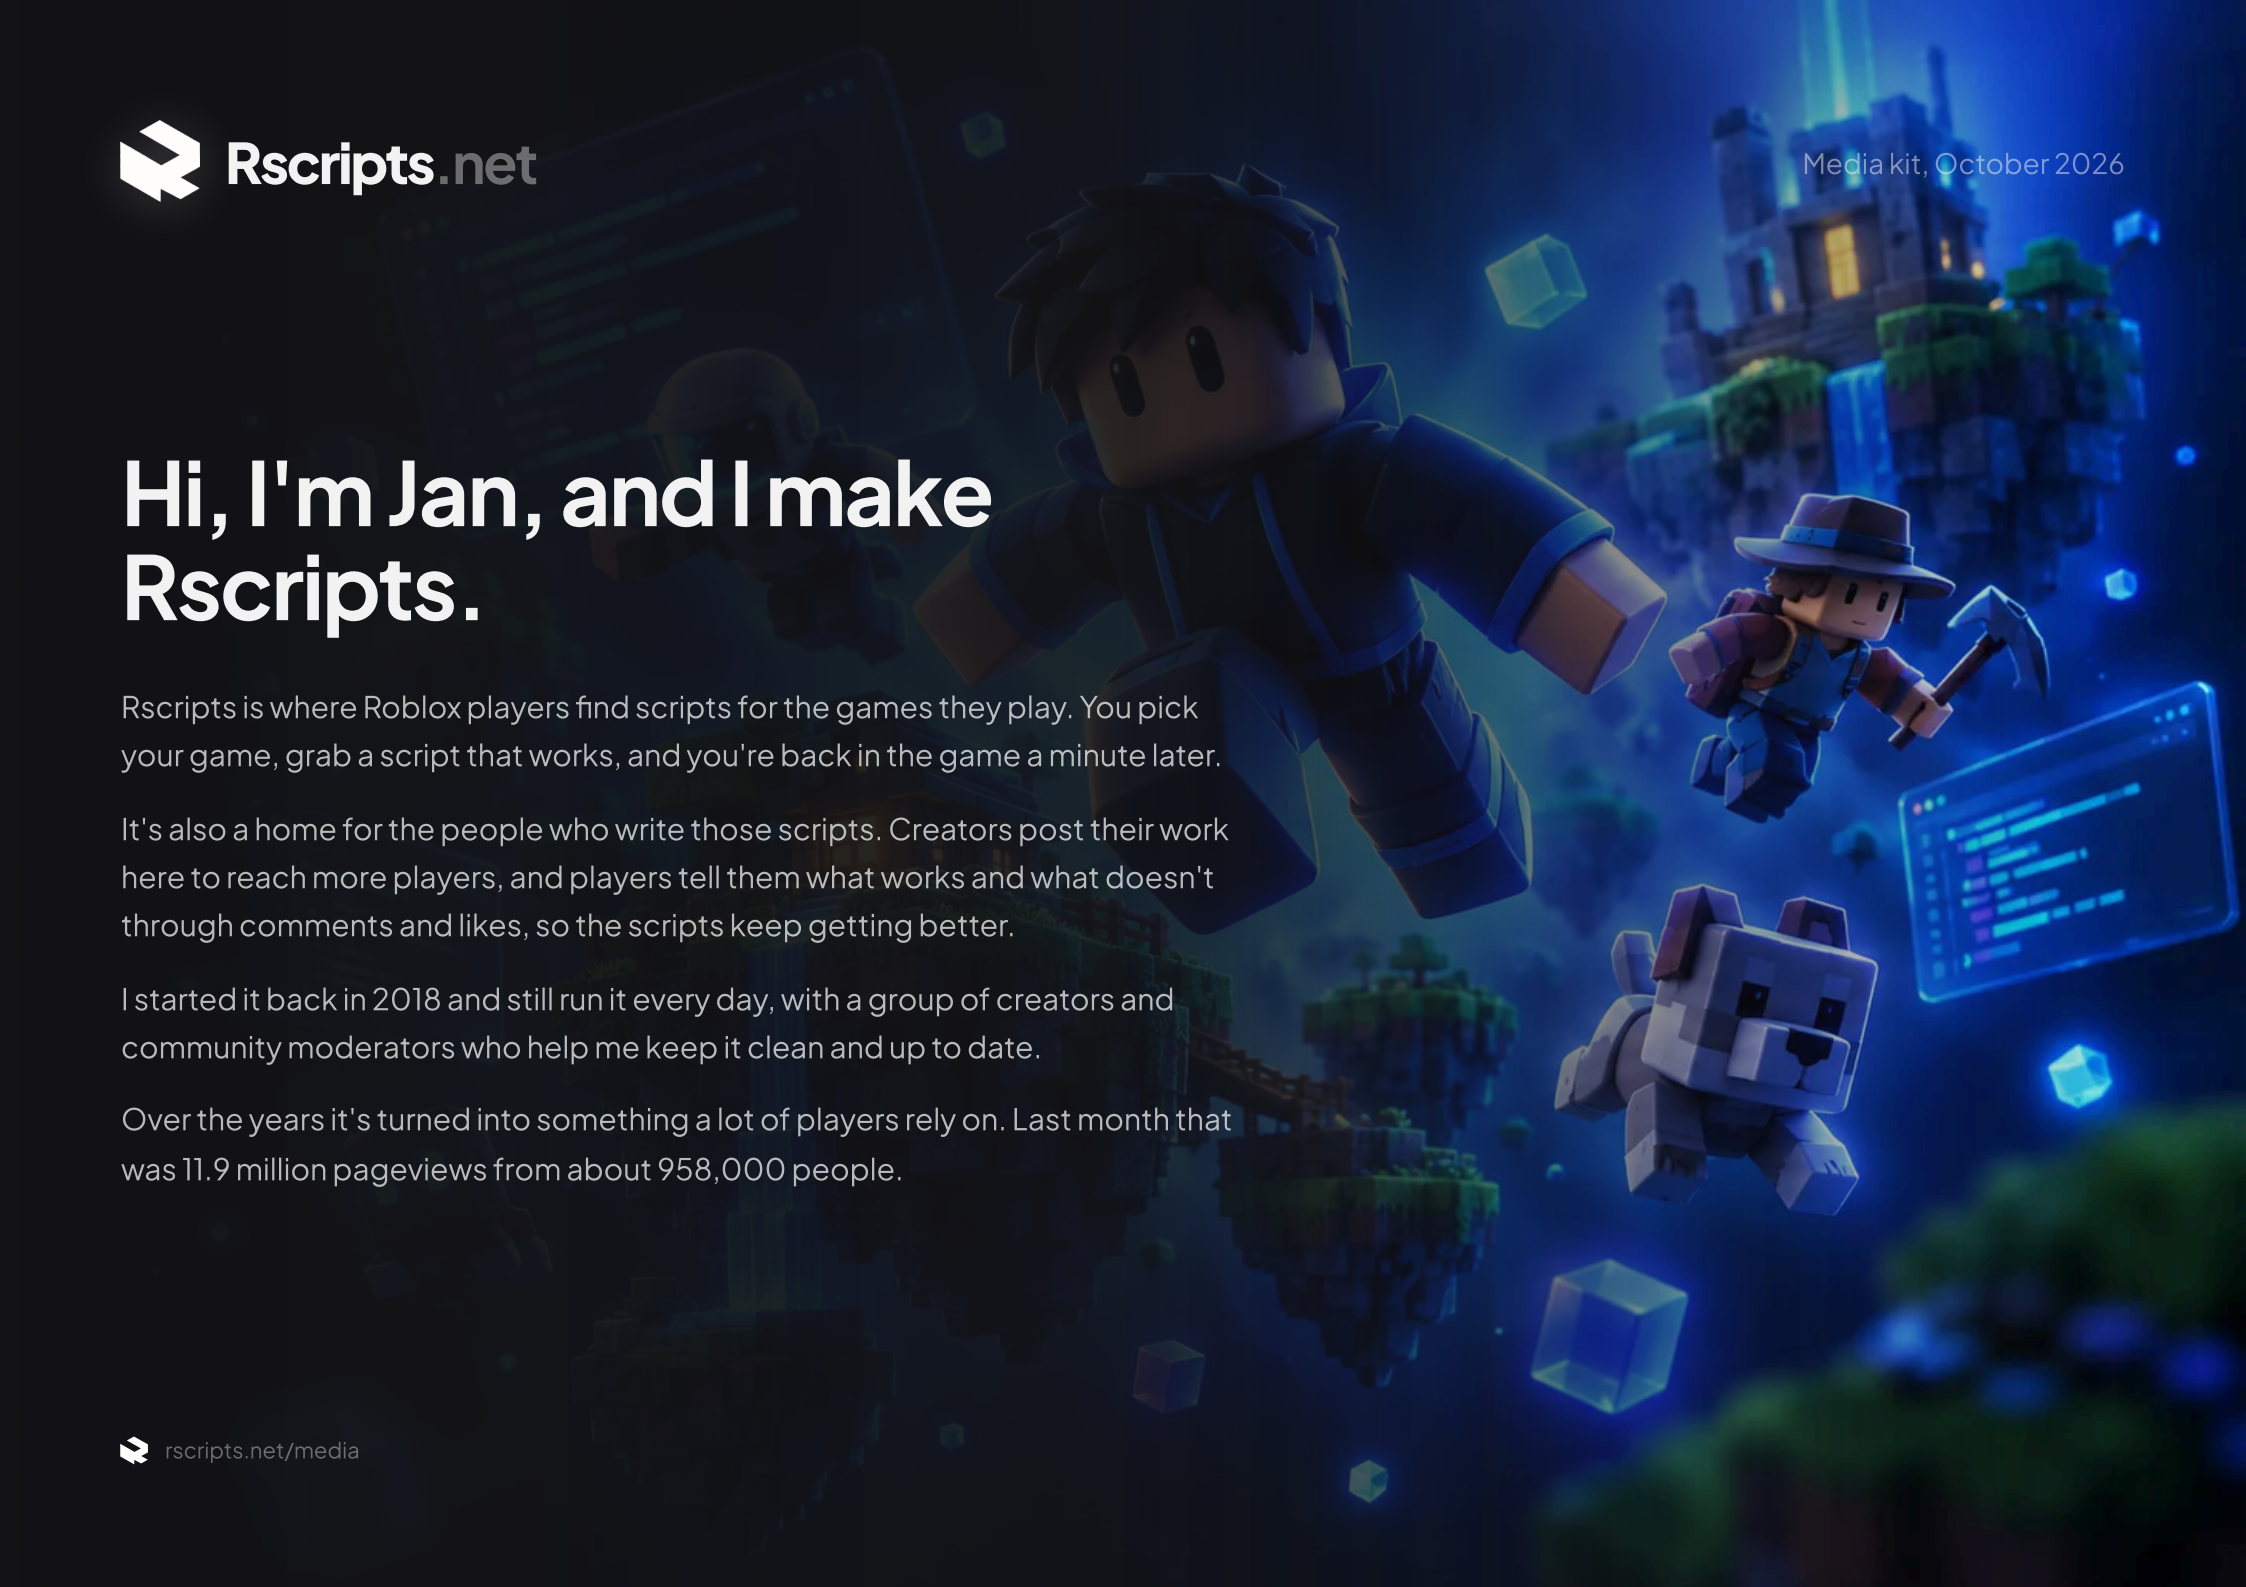

Hi, I'm Jan, and I make Rscripts.

Rscripts is where Roblox players find scripts for the games they play. You pick your game, grab a script that works, and you're back in the game a minute later.

It's also a home for the people who write those scripts. Creators post their work here to reach more players, and players tell them what works and what doesn't through comments and likes, so the scripts keep getting better.

I started it back in 2018 and still run it every day, with a group of creators and community moderators who help me keep it clean and up to date.

Over the years it's turned into something a lot of players rely on. Last month that was 11.9 million pageviews from about 958,000 people.

11.9M
pageviews a month

958K
people a month

1 in 4
visitors from the US

Sep 6 to Oct 5, 2026, from OneDollarStats.

Who comes here

Players from all over the world. The US is the biggest group, about one in four visitors, followed by the Philippines, Brazil and Russia. About half of them are on a computer and half on their phone, and most come straight to the site instead of through search.

Where ads show up

I keep it to a few spots so the site stays nice to use. Most of them sit on script pages, which is where people spend their time.

- A banner right under the script header, and above the list on browse pages
- One tall ad next to the script on desktop that stays in view while people read
- One box between the description and the code
- A row inside the script lists, which simply disappears when there is no ad

If you'd like to work together, or just have a question, I'd love to hear from you. You can reach me at rscripts.net/contact.
